

The 4th of September 1865, was remarkable as the day upon which the newly established Supreme Court for China and Japan was opened. With its constitution all are familiar, and we need therefore do no more than call attention to the more important cases which have come before it. The case of the Municipal Council against the "Eastern Dispensary" was the first business of the Council, and gave it a firm base of operations against others who may dispute its right to enforce taxes levied by the land-tenants. Again, the equally important case of "Hoggin versus E. A. Reynolds," set at rest all controversy as to the right of lenders of land on the banks of streams to the foreshore formed by the deposit of sand and mud, and cases have developed the attention of the Court. In one, in which three Englishmen in company with certain Americans were charged with robbery with violence and manslaughter at a Customs barrier at Chipao, the prisoners were found guilty of the lesser offence, and were sentenced to three years penal servitude. Two cases of murder have been tried. The first, of a Chinese against a Chinese, was a case of a Chinese murdering a French (see page 10).

FRANC MEDICINES IN VOGUE.

New and most valuable Medicines, for

hitherto intractable and incurable Diseases.

UNLIKE the Patent Medicines generally imported from France have been severely tested and scrutinized by the most eminent Government and private analytical and operative chemists and physicians of Paris, and are found to be much more than the entire Parisian Medical Faculty, attached to the Government and other Hospitals, &c. in the French Dominion, ever after rigorous trials, with the fullest confidence, and to commend them to the favourable notice of all ailments, not only under ordinary diseases, but those who may be "hoping against hope."

No more Liver Oil.—Syrup of

"Tolled" Horse-Radish.

Prepared by GRIMMUTH & Co.

According to the Certificate of the physicians of Paris Hospitals detailed in the prospectus, and with the approbation of several Academies, Syrup is considered the greatest success in the place of Cod Liver Oil, to which it is really superior. It cures diseases of the chest, scrofula, lymphatic disorders, green scrofula, rheumatic affections, &c. &c. It is a powerful tonic, and is administered with the greatest facility to young children subject to humors, or obstruction of the bowels.

Dr. COZZARELLI, of St. Louis Hospital, Paris, recommends it particularly in cutaneous diseases, conjointly with the pills which bear his name.

No more Consumption.

Disease of the Chest.—Syrup of Hypophosphite of Magnesia, manufactured by GRIMMUTH & Co., Chemists of Rue de la Vierge, Paris.

This new medicine, which is delicious to the palate, is a sovereign remedy for coughs, colds, irritation of the lungs, and also an excellent remedy in cases of consumption. Under its influence the cough abates, nocturnal perspiration ceases, and the patient rapidly recovers health and strength.

No more Indigestion or Dyspepsia.
